

CHLORPYRIFOS

General Overview

- Currently, chlorpyrifos remains registered and is being re-evaluated through EPA's re-evaluation program, registration review.
- In September 2007 the Pesticide Action Network of North America (PANNA) and Natural Resources Defense Council (NRDC) submitted a petition seeking revocation of all tolerances (maximum residue levels in food) and cancellation of all chlorpyrifos registrations.
- Over the past several years, EPA has conducted several risk assessments in response to this petition.
- Despite several years of study, EPA concluded that the science on possible neurodevelopmental effects is far from resolved and would benefit from additional evaluation through the process Congress required EPA to follow to evaluate chlorpyrifos, the FIFRA Registration Review process.
- In March 2017, EPA denied the petition.
